1 INTRODUÇÃO:

2 RESULTADOS E DISCUSSÃO:

3 METODOLOGIA:

Procedeu-se uma revisão integrativa de literatura na base de dados da Biblioteca Virtual em Saúde, com as palavras-chave "demência" e "metabolismo", utilizadas em associação. Foram inclusos 222 artigos que abordaram a correlação de parâmetros metabólicos com a demência e foram excluídos 202 artigos que tangenciaram o tema, que apresentaram desenho insuficiente ou que avaliem diagnóstico, prognóstico ou terapêutica. Por fim, foram utilizados 20 artigos para a elaboração deste trabalho.
